WHAT IS A SUBJECT DISKETTE?

The LearningWare diskette in this package provides many additional subject areas to increase the extendability and flexibility of your master diskette. You can create your own subject areas with the authoring system or use the ones provided. The LearningWare diskette is not an independent program and must be used with its respective master diskette. Advanced Ideas produces a library of LearningWare diskettes available for your collection at home.

USING A TIC TAC SHOW SUBJECT DISKETTE:

This diskette must be used in conjunction with the Tic Tac Show main program diskette. First insert the Tic Tac Show master diskette and boot up the computer. For details, refer to the manual accompanying your master diskette. A menu will appear on the screen. Select the number "1" indicating that you wish to play the game. Answer the questions as they appear on the screen. Remember to press *RETURN* after each answer.

Finally you will see this message on your screen:

"Insert the proper subject area diskette"

At this time insert the diskette from this package into your disk drive and press *RETURN;* proceed with the program as usual. Remember that should you wish to return to the main menu you will have to replace the subject diskette with the master diskette.

If you have any problems or questions, please refer to the Tic Tac Show manual for more detailed instructions.

Following are the subject areas with brief descriptions of each. Titles of the Apple*, Commodore**, and IBM*** versions are noted.

*APPLE is a registered trademark of APPLE COMPUTER INC.
**Commodore is a trademark of COMMODORE BUSINESS MACHINES INC.
